TO: Harlan Hills Property Owners
RE: Use of Pesticides and Herbicides on Lawns

As you will recall from our Restrictive Covenants, use of lawn chemicals is prohibited from use in Harlan Hills.

Specifically, and this list may be changed if the Wisconsin Department of Agriculture, Trade and Consumer Protection deems prudent, the chemicals banned are: **Beauvel, Command, Diquat, Paraquat, Tordon and 2-4D.** Per our Restrictive Covenants, fines may be levied by the UW Arboretum. If you have a lawn company servicing your lawn, let them know about this.

Please review the enclosed Guidelines that discuss the pesticide issue and other points of harmonization with the UW Arboretum. The Arboretum is our neighbor and an important reason you have chosen Harlan Hills.

Thanks for your cooperation.
